

CPSC 330 Lecture 12: Ensembles

Announcements

- Midterm is being graded this week - we hope to have the results for you soon.

Ensembles

Today, we will do a class of live coding and going through the Jupyter Notebook to get back into the swing of things.

Group Work: Class Demo & Live Coding (if time permits)

For this demo, each student should [click this link](#) to create a new repo in their accounts, then clone that repo locally to follow along with the demo from today.

If you really don't want to create a repo,

- Navigate to the [cpsc330-2024W1](#) repo
- run `git pull` to pull the latest files in the course repo
- Look for the demo file [here](#)
